

Caveatron Wiring Diagram

12m LIDAR Module (RP) - Rev. A

v. 2019-02-12

*NOTES

1. Output voltage of regulator sets LIDAR rotation speed. For approximately 5 Hz rotation speed, the set voltage is 3.68V.
2. Numbers designate pin numbers on connector.
3. RX and TX as shown at the LIDAR connector are from the perspective of the Arduino Due board.
